xss 注入

xss 注入	1
1比较耍赖的方法	1
2.题目告诉我们 alert 弹窗就会成功。	3

这里有两种方法

1.比较耍赖的方法

http://206.189.214.99:4080/xss/

打开网址

我们右键, f12。都会收到提示。并且不会执行。

我们直接去设置里找 web 开发者查看源代码。

```
confirm("此路不通!!!");
    if (document.layers) {
                     document.captureEvents(Event.MOUSEDOWN);
    document.onmousedown = click;
  document. Onmousedown - click;
document. oncontextmenu = new Function("return false;")
document. onkeydown = document. onkeyup = document. onkeypress = function () {
if (window.event.keyCode == 123||window.event.keyCode == 17) {
confirm("不让你用F12利Ctr1!!!");
                                        window.event.returnValue = false;
                                       return (false);
  // <--123---112是F1-F12的代码数-->
   window.alert = function()
    confirm("恭喜你成功弹窗, d0g3 [xss_is_easy]");
    (/script)
   <title>欢迎来到dOg3 xss</title>
    </head>
    (body)
 (hl align=center)d0g3 xss</hl>
(hl align=center)没有找到和相关的结果、</hl>
(h2 align=center)没有找到和相关的结果、</hl>

                                                                                                                                                                                                                                                                             之 微信号: lemon-sec
```

被标注出来的字就是我们要的 flag。

2.题目告诉我们 alert 弹窗就会成功。

所以我们需要想办法让含有图片的那个界面弹窗。 我们先去 web 开发者选项中找到控制台。

我们同样可已看到源代码,这时我们需要在空白框里做文章。

每当我们向白框输入东西的时候,总会返回我们输入的东西。

这个时候我们就会看到 vlaue 里有 123。

所以我们要想办法插入 Javascript 中的 alert () 函数使其弹框。只要弹框我们就会得到我们想要的东西。能输入的地方只有白框内。

我们会用到\script\\/script\标签。也就是我们需要闭合标签。

<input name="keyword" value="">

我们输入的东西在 value 的双引号里,首先闭合标签。

"><script>alert(2312313135)</script>
